

Fabulous bird feeder
 Outsmart the squirrels!

Squirrel-proof Bird feeder

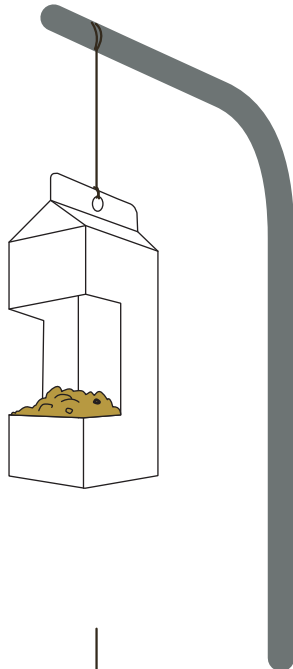

Squirrels are very greedy and pinch all the nuts and seeds before the birds get chance to eat them!

Try these secret tricks to stop squirrels in their tracks.

Slippery slide

Hang your feeder from a pole? Spread Vaseline along it so it's more difficult for squirrels to climb up.

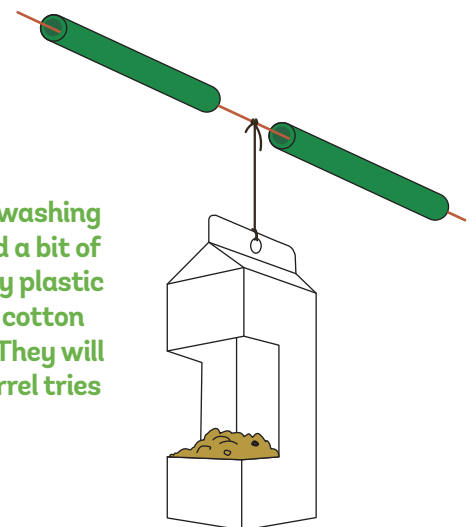

Brilliant baffle

Fix a large plastic bowl over your feeder to make it harder for squirrels to reach the nuts and seeds.

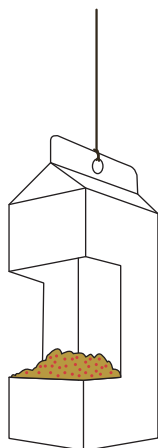

Send them spinning

Is your feeder on a washing line or wire? Thread a bit of hose pipe, an empty plastic bottle or an empty cotton reel along the line. They will spin when the squirrel tries to hop along them.

Hot, hot, hot!

Try adding hot chilli powder to bird seed. Squirrels don't really like it, but it doesn't bother birds.

Which tricks worked best? Can you think of any others?

Feel free to copy and share this for personal and educational use – and don't forget there are loads more brilliant activities to download on our website!
